OUTDOOR STAIRS

FROM THE GARDEN,
ALL SEASONS

GARDENTOP

SAFE, STURDY AND WEATHER RESISTANT STAIRCASE DESIGNED WITH PURE LINES

Gardentop is a straight flight staircase for outdoor use in galvanized steel. From your house to your garden, from your balcony to the ground floor, from your terrace to your bedroom – in many ways this outdoor staircase can connect floors and levels of your outdoor living space while decorating it with clean and pure lines.

WEATHER RESISTANT AND SAFE IN WET WEATHER

With this type of staircase, it is especially important that the materials are weather resistant, and that the use of the stairs is safe even in wet conditions. As this is a particularly suitable material, hot-dip galvanized steel side panels are used for the stringers and perforated sheets in hot-dip galvanized steel are used for the treads.

It is ideal for terraces with rather low heights and can also be the perfect solution if you want to connect the upper floor with your garden. By assembling individual sections, the desired heights can easily be achieved.

ADJUST THE HEIGHT OF GARDENTOP

2 treads:	36 – 44 cm
3 treads:	54 – 66 cm
4 treads:	72 – 88 cm
5 treads:	90 – 110 cm
