# ACADIA

## ACADIA BALUSTRADE

ACADIA balustrade kit is a high-quality vertical balustrade system designed for flexibility and durability. Each kit covers 1 metre, and you can extend it in 1-metre increments to fit your desired length. For UK building regulation compliance, the handrail height and vertical infill gaps (less than 100mm) are carefully designed.

- Total height including handrail: 96.5 cm
- The aluminium construction with a black powder-coated finish (RAL 9005) ensures it is protected against abrasion and corrosion.
- Includes black, square-shaped floor-mounted posts, pre-mounted baluster section with 8 balusters, leaving only a 75mm gap. 1m handrail, 70mm wide for a comfortable grip.
- The balustrade kits can be extended in a straight line, and we offer Handrail Corner Connector 90° for angled situations.
- For stair, additional Handrail Pivot Connector is available upon request.
