THE STORAGE SYSTEM  
FOR THE 3<sup>TH</sup> DIMENSION

# BEAM-IT-UP

## THE 3<sup>RD</sup> DIMENSION OF STORAGE

Let's face it! We never have enough space, when your family grows or living space shrinks with your next project? You just need more storage space.

BEAM-IT-UP gives you more freedom, without you having to part with something that is important and still needs to be used from time to time. The clever storage system consisting of wall rails, cross bars and storage modules elegantly opens the space under the ceiling as a usable storage space. BEAM-IT-UP storage system fits into almost any room.

Above left: Requirements for your room: room height > 230.

Height above possible doors or windows must be 35 cm.

Width from 94 cm to max. 214 cm. Room length must be > 130 cm.

Top right: BEAM-IT-UP opens unused storage space and address the mess.

Left: The drop-down ceiling storage boxes are effortless to operate.

Center: A ladder as an accessory allows easy access to shelves and net.

Right: Matching wall mounted coat hooks for BEAM-IT-UP.

## CEILING SHOE STORAGE BOX

The shoe storage box is comfortable and easy to store under the ceiling offering space for 12 pairs of shoes, time to get those shoes organiser. The storage bars can be adjusted so you can accommodate shoes in different sizes as well.

### MODULE

### DIMENSIONS:

Length: 120 cm

Width: 60 cm

Height: 34 cm

Material: Wooden frame with gas springs and patented articulated lever, lid high density fiberboard with CPL-coating

Dimensions storage with 3 compartments:

Height 103 cm x Width 44 cm

**WALL RAIL**  
Length: 130 cm  
Material: Anodized aluminium

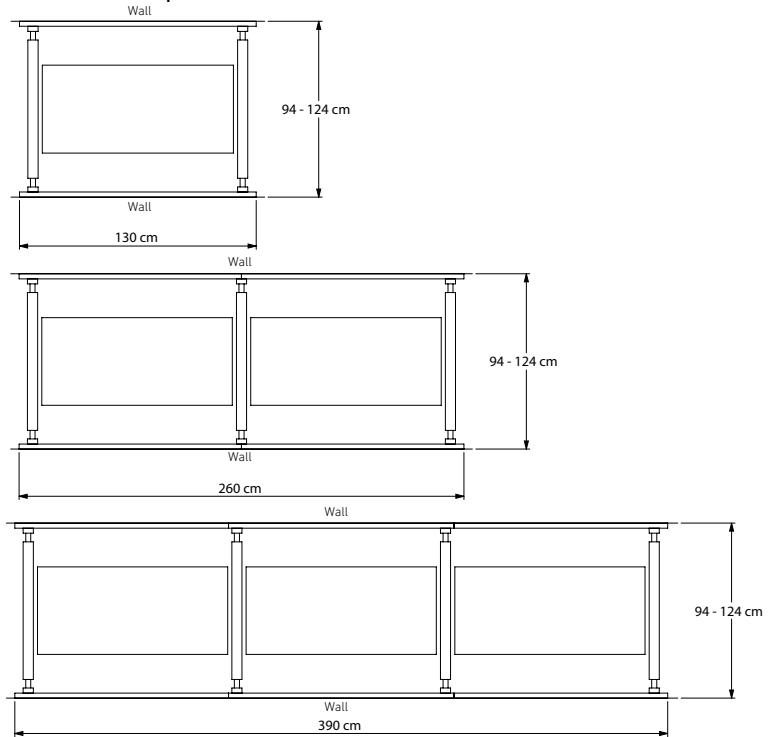

# BEAM-IT-UP

From the modules of BEAM-IT-UP you build your own personal and customised storage solution. You can combine wall rails and cross beams, then add your storage box, shelf or net. You can then choose to the shoe rack? Or the organiser is you wish? The dimensions of your room dictate the framework of wall rail and beams, then you can select the modules that suit you.
